 “The Joy Strategist”

Laughter!

It Ain't Rocket Surgery

(It's Brain Science)

For a speaker, providing great content is only part of the challenge. It also has to be delivered in a way that engages listeners and allows them to apply the message to themselves. That's where humor comes in. Sure, laughter feels good, but it also has a serious side as a great learning tool because it raises the chances that the content will stick.

As a former educator, stand-up comedian and comedy writer, Dave Caperton, “The Joy Strategist” combines a passionate teaching style with comic timing to provide transformative insights on joyful learning, change, service and managing stress in a way that is high-value (and lots of fun).

Dave Caperton is the author of **Happiness Is a Funny Thing**. A book he describes as a “why-to” guide to making the positive perception choices known to increase levels of personal happiness that can lead to less stress, more job and relationship satisfaction and better health.
